## **BOX-TRAP**

Animal live-trap for safe ungulate capture, without the use of chemical immobilization drugs. Used by biologists, animal control officers, rescue workers and game managers. Our steel frame is pre-cut and drilled for assembly. Simply bolt the trap together and attach the pre-cut mesh netting and trigger.

Animals are baited into the rear of the trap where a trip-line is set to drop the door behind them. Once captured, the animals can be hobbled through the bottom opening of the trap.

Each trap includes:

- Steel frame
- Mesh netting
- Trigger
- All hardware
- Trip line

Two sizes are available

Medium (3'Wx 4'Hx 6'L)  
Suitable for deer size animals  
Price: \$650 plus shipping  
Please allow 3-4 weeks for delivery

Large (4'Wx 6'Hx 7'6"L)
